The bath is equipped with a stirrer, mounted in a rack which also serves as a holder for 10 test tubes. An adjustable clamp on one side of the bath is capable of holding in vertical position test tubes of diameters between three-eighths and three-fourths inch. Accessory holders are available for 1-inch outside diameter test tubes and for specific-gravity bottles. A diagram of the temperature-regulating system, which is shown in figure 16, represents a modification of that devised by J. L. R. Morgan. 9 It consists of a thermoregulator operating on a 12-volt direct-current primary circuit and opening or closing a secondary circuit of 110 volts direct current by means of a high resistance telegraphic relay. The latter circuit operates a telegraphic...
