EGYPT, ENERGY AND THE ENVIRONMENT: CRITICAL SUSTAINABILITY ISSUES (HB)

DOWNLOAD

Adonis & Abbey Publishers. Hardcover. Book Condition: New. Hardcover. 340 pages. Dimensions: 9.2in. x 6.1in. x 0.8in. Pure environmentalism and pure resource exploitation can be integrated together to form an encompassing sustainability solution. This is the main message of this book based on an innovative structure-concentration-incentives methodology applied to Egypt. This methodology provides a basis for achieving environmental sustainability based on endogenous source-driven forces of change in contrast to the traditional effects-dominant oriented approach. Though the books methodology could be used as a framework of analysis in environmental sustainability research for any developing country, Egypt provides a rich case study because of its historical, socio-economic, and political constructs. Sustainable development is generally seen as a tradeoff between resource efficiency and social equity such that total resource essentials in society can become sustainable in the long run in a manner that meets the needs of current generations without compromising the ability of future generations to meet their own needs. Environmental sustainability cannot be implemented without the direct inclusion of structure (form), concentration (effect), and incentives (drivers) as critical policy choices because: (1) they constitute a necessary condition in any countrys path towards sustainable development, (2) they must be implemented simultaneously as a target and constraint, and (3) they require social and political sacrifice complemented by endogenous-based systems in contrast to authoritarian solutions. Egypt, Energy and the Environment presents research on Egypts energy and environmental resources from multidisciplinary perspectives. It offers sustainability solutions to many of the countrys problems relating to energy, pollution, water, gender, wildlife, politics, economics, management, ecology, and information technology. The books method of analysis can be applied to other developing countries as well. Tarek H. Selim is Associate Professor of Economics at the American University in Cairo and Faculty Affiliate to Harvard Institute for Strategy and Competitiveness. He has...
