Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from **A Paper on Forestry** I intend in this paper to further, but briefly, illustrate and enforce a few fundamental principles of forestry of which I have before treated. I am encouraged to do this by the number of groves which I see have been attended to in various and widely-separated sections of the state since this effort in behalf of forestry was commenced; and by the invitations I receive to lecture upon the subject; and letters requesting copies of my paper upon forestry, published in the last report of the Board of Agriculture (my three hundred extra copies are exhausted); and of letters inquiring for information upon certain points. These letters come not only from this and other New England states, but from the central and Western. B. E. Fernow, chief of the division of forestry under our government, says that the total annual product of wood material of all sorts consumed in the United States may be valued, in round numbers, at one billion (\$1,500,000,000) dollars, or, roughly speaking, twenty-five billion (25,000,000,000) cubic feet of wood, the annual increase of five hundred million acres of forest in fair condition. This value exceeds ten times the value of our gold and silver output and three times the annual product of all our mineral and coal mines put together. It is three times the value of our wheat crop, exceeds the gross income of all the railroads and transportation companies, and would more than wipe out the remaining public debt of the United States. (See Bulletin No. 5.) About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This...
