Scientific Publishers, 2003. Hardcover. Book Condition: New. Plant parasitic nematodes are one of the least understood agricultural pest problems throughout the world. Science of Plant Nematology has grown rapidly in the last three decades. There is a wide gap between the vast information generated for nematode control and that, which is actually utilised. The present book ``Advances in Nematology`` provides an authoritative review account of many aspects of current interest and progress in the field of Plant Nematology that has been made in the recent past. This book includes 21 articles by eminent nematologists on different aspects of the subject. Information on application of molecular biology in nematology, nematodes as biological model, race status in plant parasitic nematodes and nematode vectors of plant diseases have been reviewed covering all major aspects. Nematode diseases on wheat, rice, tobacco, mint, barley and horticultural crops and their management, specially in context to Indian scenario have been covered. Newer approaches for the management of plant parasitic nematodes including use of VAM fungi, biocontrol agents and integrated nematode management strategies have been included to project out their use on field scale. Articles on role of nematodes in disease complexes with fungi, genetic studies on the resistance of barley, breeding for nematode resistance in forage legumes and nematode pests of economically important crops in India and their managements have been added to the value of the book. Scholars and students of Nematology, researchers and extension workers and plant pathologists will find this book very useful.

1. Application of Molecular Biology in Nematology A.K. Ganguly and Umarao
2. Nematology as Biological model R.K. Walia
3. Race Status in Plant Parasitic Nematodes R.K. Walia & S.K. Mehta
4. Nematode Vectors of Plant Diseases and its Perspectives B.K. Goswami, Archana, Mittal and S.B. Sharma
5. Plant Parasitic Nematodes Management Opportunities...
